# gammaCore Provides Veterans With Clinically Proven Headache Relief

gammaCore™ non-invasive vagus nerve stimulator (nVNS) provides clinically proven, reliable relief from multiple types of headache pain, including migraine and cluster headache, by gently stimulating the vagus nerve.

## How to Order gammaCore

A VA health care provider must submit a consult to Prosthetics. Once received, Prosthetics will submit a completed PO to Lovell Government Services by phone at 850-684-1867, fax at 850-254-9853, or email at [CustomerService@lovellgov.com](mailto:CustomerService@lovellgov.com).

electroCore will then ship the device directly to the Veteran’s home and can follow up with them to provide personalized training, product education, routine follow-ups, and refill reminders.

## Indications and Important Safety Information

gammaCore™ is intended to provide non-invasive vagus nerve stimulation (nVNS) on the side of the neck for preventive treatment of migraine and the acute treatment of pain associated with migraine in patients 12 and older. gammaCore is also indicated for adjunctive use for preventive treatment of cluster headache, acute treatment of episodic cluster headache, and treatment of hemicrania continua and paroxysmal hemicrania in adult patients.

gammaCore should not be used by people with an active implantable medical device or have a metallic device implanted at or near the neck. NOTE: This list is not all inclusive. Please refer to gammaCore.com or Instructions for Use for complete safety information, including indications, contraindications, warnings, precautions, and instructions, before using or prescribing this product.

Available by prescription only. US Federal Law restricts this device to sale by or on the order of a licensed healthcare provider.

## Your Path to Non-Drug Migraine Relief Starts With gammaCore

gammaCore™ non-invasive vagus nerve stimulator (nVNS) provides clinically proven, reliable relief from multiple types of headache pain by gently stimulating the vagus nerve.

This portable, easy-to-use medical device has 6 FDA-cleared indications for headache pain, including migraine and cluster headache, and is available by prescription through your VA provider.

### When to Use gammaCore

Use gammaCore twice daily and as needed (up to 24 times daily) to manage pain.

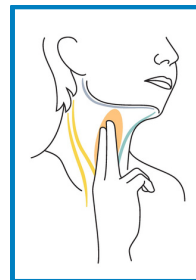

**Prevention:** A treatment consisting of 2 two-minute stimulations on the same side of the neck morning and night.\*

**As Needed:** A treatment consisting of 2 two-minute stimulations on the same side of the neck as needed; repeat treatment if pain persists.

\*Additional treatments may be recommended for cluster headache and other trigeminal autonomic cephalalgias.

## How It Works

gammaCore delivers gentle, patented electrical stimulation to the vagus nerve through the skin at the side of the neck to reduce pain and alleviate your headache symptoms.

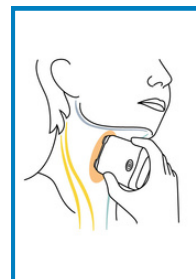

**Find the treatment location:**

Use 2 fingers to locate your pulse on the side of your neck.

**Prepare the device:**

Apply a pea-sized amount of the provided gel and turn on the device.

**Deliver the stimulation:**

Place the device on the treatment location and increase the stimulation until you feel a slight muscle contraction near the corner of your mouth.
